

ABSTRACT

“**Art World**” is a web application which is meant for users who are looking for purchase and sell drawings. The proposed system includes three users they are administrator, customer and the Artist. Registered customers can login to the site and place their orders and do transactions. Artist will get up to date notifications of each order and they can contact with the customers and get orders from them. The administrator has the central control over the whole system. Administrator do order management, data management and user management.

The system includes 3 modules. They are:

1. Admin Module

- Admin can add drawings detail and price
- Can view user
- Can view order
- Payment details
- Give notification
- Give solution

2. Artist Module

- Add drawings
- Add price
- Add video demonstrations
- View feedback of the customer

3. Customer Module

- Search drawings
- Send the request to the artist
- Give feedback
- Give complaints
- Book the drawing
- Chat with Artist
